

# Cash King : Migrate From Older Version

## v8.0 to 9.0

---

This guide is for you to migrate from the older **version (v8.0)** to the **latest version (v9.0)**. To avoid unexpected data loss, we recommend that you backup your files before doing this step, this step is for the **Admin Panel** and **App** side only.

### Update Admin Panel

1. Login to your cPanel hosting, open **File Manager**.
2. Navigate to the directory where you put the php admin panel code.
3. Download the latest source code from Codecanyon and unzip/extract it. You will find updated admin panel files in the **Update** folder. Replace mentioned files.
  1. index.php (Replace File)
  2. settings.php (Replace File)

### Application Side:

- **Replace/Delete below mentioned files. ( Files provided in Update Folder )**
  1. java/com/aadevelopers/cashkingapp/Activity\_Login.java (Replace File)
  2. csm/fragment/Main\_Fragment.java (Replace File)
  3. app/src/main/res/layout/fragment\_main.xml (Replace File)
  4. app/src/main/AndroidManifest.xml (Replace File)
  5. csm/OfferWallActivity.java ( Delete File From Location)
  6. csm/OffersActivity.java ( Delete File From Location)
  7. csm/adapters/OfferToro\_Adapter.java ( Delete File From Location)
  8. csm/adapters/OfferWall\_Adapter.java ( Delete File From Location)
  9. csm/model/OfferToro\_Model.java ( Delete File From Location)
  10. csm/model/OfferWall\_Model.java ( Delete File From Location)
  11. csm/model/offers\_model.java ( Delete File From Location)

12. res/layout/activity\_offer\_wall.xml ( Delete File From Location)
13. res/layout/item\_offertoro.xml ( Delete File From Location)
14. res/layout/item\_offerwall.xml ( Delete File From Location)
15. csm/InstallActivity.java ( Delete File From Location)
16. res/layout/activity\_install.xml ( Delete File From Location)
